

You can use this litter with a Scoop Free litter box or a traditional litter box. It tends to cost around \$5 less than Fresh Step Crystals, but doesn't absorb odors as well.

One bag last about 30 days with one cat and about 2 1/2 weeks with two cats.

The litter is made of silica sand, water and oxygen.

There is NO crystalline silica in this product and dust is virtually nonexistent.

The pearls absorb urine and dehydrate feces so that it eliminates most of the smell shortly after the cat exits the box.

Pearls sometimes find their way outside the box, but don't bother trying to sweep them up.

They roll away.

Just grab the vacuum extension and vacuum them up.
